

Mimecast Security Awareness Training

Mitigate Real Risk and Revolutionise Security Awareness with a Human-Centric Approach

The Problem

Human risk is real risk, but it often goes unmitigated. Why? It's exceedingly difficult to identify, and few solutions exist that can do it quickly and at scale.

Security teams are left doing the cleanup, using home-grown tools and visualisations to better understand human risk, or simply hoping that a one-size-fits-all security awareness program can offset it. The truth is – it can't.

Legacy security awareness solutions have always struggled to answer the most important questions they're asked: "Does training work? Does it reduce risk?" It's time for security awareness to do more, but to do more, it needs to be re-envisioned.

The Solution

To effectively manage human risk, security teams need visibility into employees' real actions, not just simulated phishing and training engagement metrics.

Traditional awareness training data doesn't represent real risk, and we shouldn't accept it as a satisfactory stand-in considering the expanse of data available to us across the security landscape.

With a singular view of human risk based on multiple data sources, we can build a foundation of behavioural insights that powers true risk mitigation.

Unique Training Approach

Inspire a culture of awareness – through humour.

- 100+ humour-driven modules
- 2–3-minute micro-learning approach

- Covers phishing, impersonation fraud, social engineering, and more
- Aligns with industry standards (ISO, NIST, PCI DSS, GDPR, and HIPAA)

- TV & film production quality
- Award-winning content

WYCOM
TECHNOLOGY

At-a-Glance

Mimecast is a Revolutionised Security Awareness Solution powered by Mimecast's Human Risk Management Platform.

Mimecast leverages risk signals from across the Mimecast ecosystem to deliver the right intervention and training to each employee, at the point of risk, and based on real behaviours.

The solution is built for simplicity and scale, equipping security teams to focus on real security outcomes and behaviour change, while still satisfying compliance requirements and CISO-level program visibility.

8% of employees are responsible for 80% of security incidents. *

68% of security breaches involve a human element. **

Key Benefits

Identify your riskiest employees in real-time.

Gain unprecedented human risk visibility, built on behaviours observed across your collaborative landscape.

Stop risky behaviour with a smarter approach to training.

Leverage powerful risk insights to tailor intervention and training to each employee's unique risk profile

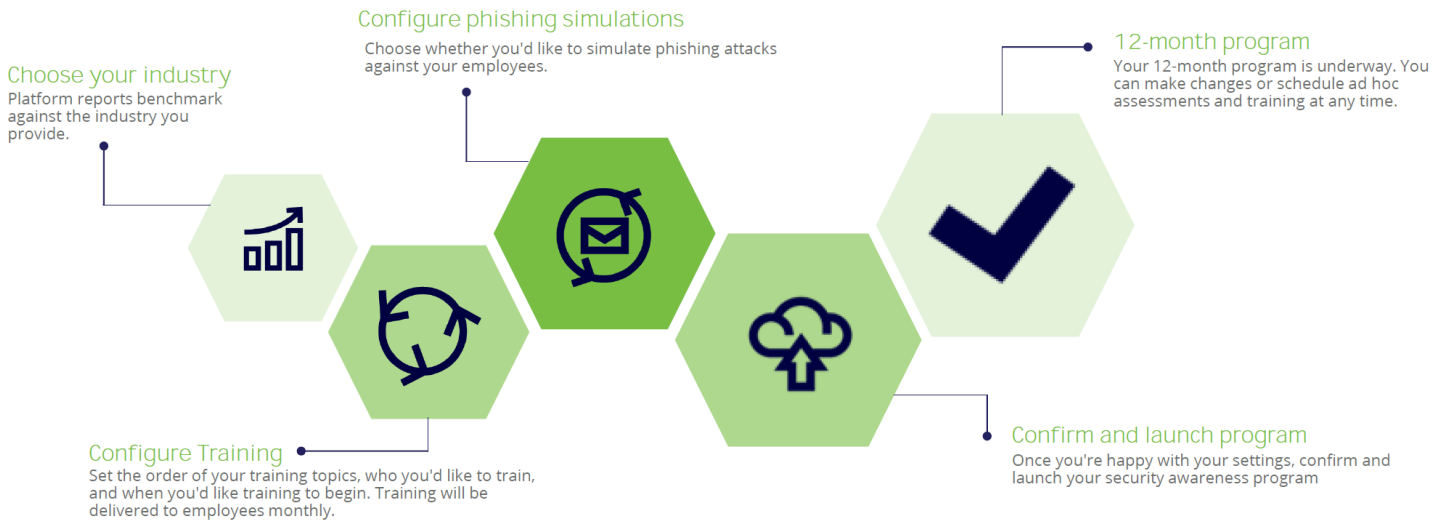

Reset your team's focus on true risk reduction.

Deliver real, measurable security outcomes from a platform built for simplicity and scale

mimecast

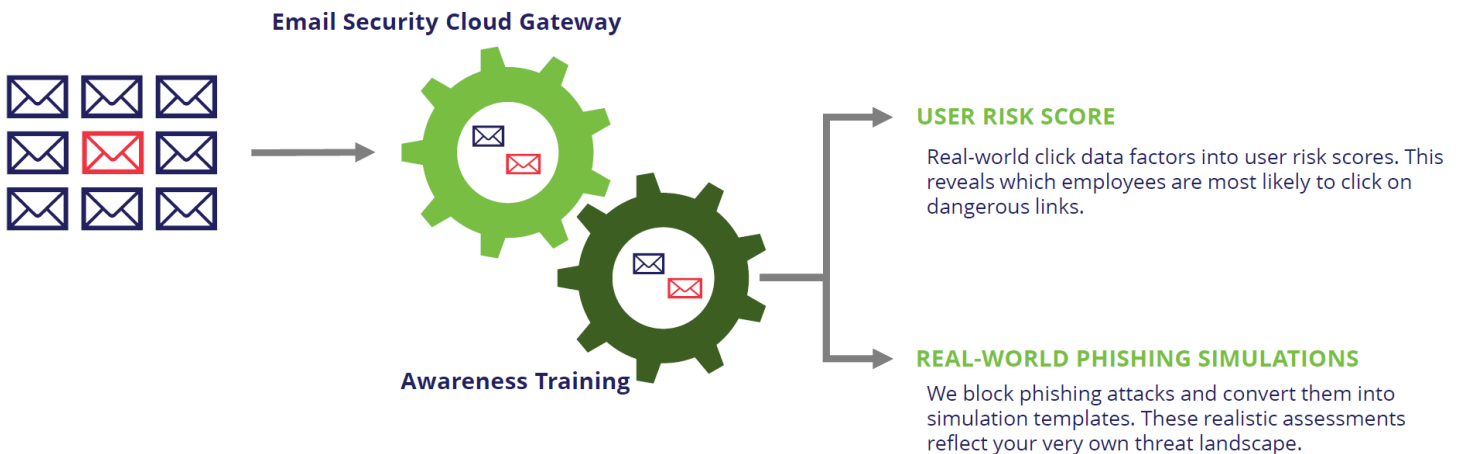

Reduce Employee Risk in Four Steps

Awareness Training launches in minutes with minimal effort.

Integrated Insights

Optimise Security Awareness with real-world threat intelligence

Mimecast Features

Feature	Details
Human Risk Dashboard	<ul style="list-style-type: none"> Company-wide human risk scoring based on real phishing data, simulated phishing metrics, and training metrics. Displays the organization's frequency of inbound phishing attacks (Attack Factor). Highlights your organisation's riskiest employees.
Individual Risk Profile	<ul style="list-style-type: none"> Individualised risk scoring based on real phishing data, simulated phishing metrics, and training metrics. Displays an individual's attack volume relative to the organisation. Records the actions taken in responses to risky events and behaviours (i.e., sending a nudge in response to the employee clicking a phishing link)
Behavioural Nudges	<ul style="list-style-type: none"> Behavioural nudges deliver timely feedback and instruction in response to real-world security events and security awareness results. Reinforces positive behaviours and addresses negative behaviour with a library of engaging mini modules (20-40s).
Training	<ul style="list-style-type: none"> 140+ TV-style training modules with a humour-forward, micro-learning approach. Covers critical security topics, including data privacy, phishing, social engineering, impersonation, and more. Aligns with key industry standards (ISO, NIST, PCI DSS, GDPR, and HIPAA).
Phishing Simulation	<ul style="list-style-type: none"> Offers an extensive library of realistic phishing simulation templates. Assesses organisational resilience against common email-based attacks.
Rapid Deployment & Automation	<ul style="list-style-type: none"> Program deploys in minutes with the help of an interactive first-time setup. Offers highly automated 12-month program administration. Additional administration can be scaled up and down as desired.

Mimecast Use Cases

Uncover your greatest sources of human risk

Mimecast's Human Risk Dashboard surfaces your organisation's riskiest employees through extensive analysis of email behaviour, phishing attack data, and security awareness metrics. By centralising multiple risk signals around the individual, Mimecast enables you to better understand and respond to the real risk facing your employees.

Focus intervention on the employees that need it most

Mimecast Engage operationalises risk signals from the Mimecast platform to deliver an array of behavioural nudges. This just-in-time, micro-learning approach equips you to train smarter and limit the amount of training for the rest of your organisation.

Satisfy compliance and keep employees engaged

Mimecast's extensive content library covers critical security topics and supports your compliance requirements. Our content is produced with your employees in mind. Each module is highly entertaining and packed with humour while still striking a balance of memorable and informative.

Simplify security awareness program administration

Your time is valuable. With powerful automation, Mimecast redirects your attention to real risk reduction and gets you out of the business of managing antiquated training and simulation tools.

Wycom is a cybersecurity leader delivering best-in-class threat prevention, detection, and response solutions worldwide. Wycom Technology is one of the industry's most trusted experts for eliminating threats, protecting privacy and data, and enabling cyber resilience.

With deep investments in research and development, Mimecast discovers over 1050 new threats each minute and validates around 40 billion daily threat queries. The company has pioneered breakthrough innovations in antimalware, IoT security, behavioural analytics, and artificial intelligence, security awareness training and its technology is licensed by more than 150 of the world's most recognised technology brands.
